ALLOCATE 40 INDEPENDENT VESSELS

CONTROL · 20 vessels **EXPOSURE · 20 vessels**

Classify each vessel once: affected OR unaffected

Treatment group → row · Damage classification → column

	Affected	Unaffected	Row total R_i
Control	8	12	20
Exposure	14	6	20
Column total C_j	22	18	N = 40

Expected count: row total × column total ÷ grand total

Control / affected → 20 × 22 ÷ 40 = 11
